

Practice Safe Sound!

Hogtunes speakers may play much louder than the OE, which can be a distraction to the rider and/or passenger. Please use caution when playing your stereo at high volume, especially in traffic.

You are a valued customer so please:

Hogtunes Amp Present*

Version 1.1

Congratulations and Thank-you for your purchase of Hochtunes 572.2-AA speakers! Since positive word of mouth is the best way to grow our business, we want your new speakers to work as well as they were designed to. If you have any questions or concerns, we are here to help. Email info@hochtunes.com, or call us during regular business hours (EST) at 705-719-6361. You can see a video of these speakers being installed at www.hochtunes.com/videos/videos/5x7RG.html If you still need help, then please consider a professional installation by your dealer.

IMPORTANT: Hochtunes 572.2-AA's are 2 ohm (2Ω) speakers and will cause damage if wired directly to 1998-2005 factory radios built in power! These will also cause damage to most car radios if wired directly to the car radios built in power. Please check your car radios specifications to make sure it is 2 ohm stable. Hochtunes 572.2-AA speakers can be used in 1998-2005 or bikes with a car radio if being powered by a Hochtunes amp, or any amplifier capable of powering a 2 ohm load.

572.2-AA Speaker Installation Instructions:

Step #1: Make sure your ignition switch stays in the “OFF” position. Remove your outer fairing/headlamp assembly, and set aside. Refer to a service manual if you need help with this. It's always a good idea to have a towel or something similar on your front fender to avoid dings or scratches if anything is dropped—this can and most likely will happen!

Step #2: Unplug the factory wires at each front speaker. Locate and remove the 3 torx head screws, and single “speed nut” that holds each speaker grill to the bike. The speakers and grills will come off as one unit. Put these aside.

Step#3: In the kit is a bag with screws. Using the supplied longer Philips head screws, install each 572.2-AA grill to the bike, and re-install the stock “speed nut” on each side. Using the shorter supplied Philips head screws, install the 5”x7” speakers to the grills, noting that the speakers must be oriented so the wire connectors are closest to the radio. **DO NOT (REPEAT—DO NOT) USE THE FACTORY SCREWS FOR THIS STEP!**

Step#4: Re-attach the factory wires to each speaker. **Note:** It is a good idea to take a pair of pliers and gently squeeze the female connectors of the speaker wires onto the male connectors of the speakers to insure a very snug fit! If wiring to a car radio, the smaller connector is the positive (+) , and the larger connector is the negative (-).

Step#5: Turn the radio on and test your speakers. Re-install the bikes fairing/headlamp assembly. Your new Hochtunes speakers are ready to enjoy!

Note-There are many different options for you to add amplifiers, tweeters, or more speakers to your system depending on the body-work on your bike. Please visit www.hochtunes.com to see all the options,. Feel free to call us to discuss or visit your local dealer.

Warranty Information:

Hochtunes speakers are warranted for a period of 20 years to the original purchaser. Proof of purchase is required for all warranty claims. **All Warranty claims must be made through the dealer this product was originally purchased from.** Products found to be defective during the warranty period will be replaced (with a product deemed to be equivalent) at Hochtunes sole discretion.

What Is Not Covered:

- 1)Any expense related to the removal or re-installation of these speakers.
- 2)Repairs to these speakers performed by anyone other than Hochtunes Inc.
- 3)Subsequent damage to any other components.
- 4)Any product purchased from a non-authorized Hochtunes dealer.
- 5)Damage to speakers from an accident or collision.

Here at Hochtunes, we design all products from the ground up, and specify all parts right down to the adhesives used to hold the speakers together. Since we are constantly testing and investigating different technologies, any and all specifications or features are subject to change without notice.
